Eggs in Space Team Tournament Program Overview

Teams explore new frontiers in creativity in this fun competitive challenge activity.

Teams are tasked to unscramble the secrets of launching and recovering eggs without cracking up.

Teams earn points the closer their capsule lands to a bulls eye target, and extra points for not cracking in the process.

Highest points in the pecking order go to teams that land eggactly in the center of the target area. Other awards go to those deemed eggxemplary in colyokialisms, and eggstraordinary design.

By the end of the activity will a team have something to cluck about or will some have egg on their face? Effective teamwork will likely make the difference!
